Lucas de Mélo Berra

Full Stack Developer | Process Automation | Integrations

Rio Grande do Sul, Brazil · lmberra2@gmail.com · LinkedIn · Project: rejoga.com.br

Professional Summary

Full Stack Developer experienced in building corporate systems, mobile apps and web platforms with complex business rules. Works end to end, from requirements analysis through development, integration, deployment and production maintenance. Experienced in process automation, third-party APIs and hardware integration, delivering solutions used daily by different departments.

Professional Experience

Senior Systems Technician | Zegla Indústria de Máquinas para Bebidas

2022 – Present

Builds custom solutions for specific departments, automating processes, integrating systems and reducing manual work.

- Electronic packing list and item tracking in shipping, with QR Code verification.
- Node.js print server with a REST API, generating ZPL labels for multiple thermal printers.
- Development and maintenance of PHP web applications for the corporate intranet.
- Flutter apps for pickups and deliveries, internal help desk, vehicle inspection and operational routines.
- Solutions for salesperson travel expenses and entries, using the Conectado interface with a separately developed engine and business rules.
- C++ PDF viewer and integrations between web systems, physical devices, scanners and printers.
- Maintenance and evolution of mission-critical systems used daily, reducing errors and increasing operational reliability.

Full Stack Developer | Rejoga – Boardgame Marketplace

Private project in production | rejoga.com.br

Development and evolution of a boardgame marketplace focused on delivering the best experience and service quality to the Brazilian market.

- Front end in React and Tailwind CSS; back end in Node.js with REST APIs.
- Payments and operations with Mercado Pago, Melhor Envio, SuperFrete and SendPulse.
- Authentication, listings, orders, logistics, notifications, support, mediation and an admin dashboard.
- PostgreSQL/Supabase, AWS S3 storage, Render hosting and Git version control.

Skills

- JavaScript and TypeScript
- React and Tailwind CSS
- Node.js, Express and REST APIs
- PHP
- Flutter and Dart
- C++
- Python and FastAPI
- PostgreSQL and Supabase
- Docker, Render, AWS and IIS
- Git and hardware integrations

Education

High School Diploma (completed)

Languages

- Portuguese: Native
- English: Upper-intermediate, for technical reading and written communication

Available for opportunities in systems development and digital products.
